Professional Summary

Java Developer with hands-on experience building REST APIs using Java, Spring Boot, Hibernate/JPA, Spring Security, JWT, and PostgreSQL. Built backend projects involving authentication, authorization, CRUD operations, validation, database relationships, and booking workflows. Strong understanding of Java, OOP, Collections, Exception Handling, and DBMS, with a focus on building clean and maintainable backend applications.

Experience

Software Developer Intern, *IT4T Solutions* 02/2026 – 05/2026
Noida, U.P.

- Developed and maintained web applications using ASP.NET MVC and C#, implementing MVC components, business logic, and CRUD-based modules.
- Built responsive user interfaces using HTML, CSS, JavaScript, and jQuery, integrating frontend-backend functionality for forms and dashboards.
- Participated in debugging, testing, feature enhancements, and deployment support, collaborating with the team using Git for version control.

Projects

Event Booking System

- Developed a Java Spring Boot REST API for event and seat booking using Spring Data JPA, Hibernate, and PostgreSQL, following a layered Controller-Service-Repository architecture.
- Implemented JWT-based authentication and authorization using Spring Security, securing booking and cancellation APIs with stateless authentication.
- Designed and developed RESTful APIs for user registration, authentication, event management, seat management, booking, and booking cancellation.
- Implemented double-booking prevention by validating seat availability and updating seat booking status within the service layer before database persistence.
- Implemented user authorization and ownership validation using the authenticated user from the Spring Security SecurityContext.
- Added Bean Validation, centralized exception handling, and structured error responses with appropriate HTTP status codes (400, 401, 403, 404, 409).
- Integrated PostgreSQL with Hibernate/JPA for database persistence and entity relationship mapping, and tested REST APIs using Postman.

Training

Java Full Stack Development Training, *QSPIDERS/JSPIDERS* 06/2025 – 01/2026
Gurugram

- Trained in Core Java, Spring Boot, Hibernate/JPA, SQL, and PostgreSQL through hands-on project work.
- Built RESTful applications and implemented authentication using Spring Security and JWT.
- Used Git/GitHub and followed backend development best practices throughout training projects.

Skills

Languages
Java

Database
PostgreSQL, MySQL, Oracle SQL

Tools
Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse, VS Code

Backend
Spring Boot, Hibernate/JPA, Spring Security, JWT Authentication, REST APIs

Core Concepts
OOP, DBMS, Collections, Exception Handling

Education

Master of Computer Applications (MCA), *Maharshi Dayanand University, Rohtak* 2023 – 2025

Bachelor of Computer Applications (BCA), *Marwari College, Bhagalpur* 2019 – 2022
